📄 Professional Summary

Data and Quality Analyst with 3.5 years of professional experience at Cognizant, specializing in SQL data validation, Python based data pipeline development and Power BI / Tableau business intelligence reporting. Demonstrated track record of reducing critical data defects by 20% and cutting manual reporting effort by 30% through automation. Currently pursuing an MSc in Data Analytics in Berlin. Strong background in ETL processes, KPI dashboard design, statistical analysis, and data governance. Fluent in English (C2), available immediately for full-time roles in Berlin.

🎓 Education

University of Creative Arts <i>MSc in Data Analytics</i>	02/2025 – Present Berlin, Germany
Aurora's Degree and PG College <i>Bachelor's in Mathematics, Statistics & Computer Science</i>	08/2021 India

📁 Professional Experience

Cognizant <i>Data and Quality Analyst</i>	10/2021 – 04/2025 Hyderabad, India
• Led data validation, reporting and automation workflows for enterprise web and mobile applications across Agile development cycles, supporting 3 cross functional teams. • Designed and optimized SQL queries for backend data validation, integrity checks and ETL consistency between source and target data in relational databases. • Developed Python scripts (Pandas, NumPy) to automate data extraction and cleaning, reducing manual reporting effort by an estimated 30%. • Built Power BI quality and test summary reports to communicate release readiness and quality metrics to stakeholders. • Automated regression and functional testing using Selenium WebDriver and Cypress, and managed defects in Jira/TestRail, contributing to a 20% reduction in critical bugs across two release cycles. • Performed web data scraping (Beautiful Soup, Scrapy) for structured analysis and used Docker and Cloudera for containerized distributed data processing.	

Core Skills

Programming & Data

Python · SQL / MySQL · Pandas · NumPy · Matplotlib · Power BI · Excel · DAX · Tableau

Analytics

Data Cleaning · EDA · ETL Processes · Data Validation · Data Modelling · Statistical Analysis · KPI Reporting · Dashboard Design · Data Governance · A/B Testing

Testing & QA Tools

Selenium WebDriver · Cypress · Postman · SoapUI · Jira · TestRail

Tools & Platforms

Docker · Cloudera · Git · Jenkins · CI/CD · BrowserStack · Katalon Studio

Data Engineering

ETL Processes, Data Validation, Data Modelling, Data Cleaning, EDA

Machine Learning

NLP (TF-IDF, Sentence-BERT, Cosine Similarity), Logistic Regression, Scikit-learn

Projects (Academic/Personal)

AI Resume Screening & Ranking System

05/2026 – 06/2026

Using NLP and Machine learning

AI Resume Screening & Ranking System

- Developed NLP-based resume screening using TF-IDF, Sentence-BERT and Cosine Similarity.
- Built Logistic Regression classifier for resume categorization. Published complete project on GitHub.

Sales Dashboard with Power BI

Power BI / DAX / Excel

- Designed an interactive Power BI dashboard that connected to a 50,000 plus row sales data set and created visualizations for revenue growth, customer segment analysis and regional performance.
- Utilized DAX measures and created drill through pages that enabled business users to create self service insights without requiring a data analyst.
- The dashboard reduced ad hoc reporting requests by empowering 5 stakeholders to independently access key performance indicators.

Data Analysis with Python (Pandas/Matplotlib)

Python / Pandas / Matplotlib

- Processed a large transportation data set (100,000 plus records) and addressed missing data, duplicates and outliers using Pandas data analysis library.
- Conducted exploratory data analysis and identified peak demand patterns. Utilized 8 statistical charts for data visualization using Matplotlib library.
- The data analysis results were used to suggest 3 potential process improvements in a summary report

KPI Reporting Pipeline SQL

SQL / Power BI

- Designed and optimized a suite of SQL queries to extract, aggregate and report 12 key performance indicators from relational databases.
- Reduced average query execution time by 40% through indexing and query restructuring.
- Output fed directly into Power BI dashboards used by management for weekly performance reviews.

Languages

- English (C2)
 - German (B1)
 - Telugu (Native)
-

Interests

- Cycling
- Painting
- Dancing
